

TheSeadyStarter™ – MVP Investor Deck

■ Strategy Overview

TheSeadyStarter™ is being developed as a trust-first trading and investing application for new and intermediate investors. The immediate goal is to complete an MVP on Replit, transition to a more stable stack (Vercel/Supabase), and build user trust via transparency, educational funnels, and consistent updates. The brand will lean into full honesty about failures and wins to differentiate from hype-driven trading bots.

■■ Execution Phases

Phase 1	MVP build on Replit (frontend + backend + auth + Stripe sandbox).
Phase 2	Whitepaper lander + ConvertKit funnel + free ebooks + demo apps.
Phase 3	Social media + TikTok creators + cold/warm email outreach.
Phase 4	Rehouse to full stack (Vercel + Supabase + Stripe live).

■ Financial Metrics (Lean MVP)

Component	Cost Saving Option	Professional Route
Frontend polish (CSS)	DIY Tailwind (free)	Freelancer £100
Backend MVP	DIY Flask (free)	Freelancer £500–800
Hosting	Replit free → Vercel free	Scale £50/mo
Auth	Clerk/Firebase free	Pro £25/mo
Payments	Stripe free	Fees only
Whitepaper design	Canva free	Pro £10/mo
Email capture	ConvertKit free	Pro £25/mo
Cold outreach	Manual (free)	Lemlist £29/mo
TikTok promo	Organic free	£30–100/video
Compliance (KYC)	Delay until scale	£1.20 per check
Audit/legal	Delay	£1,000+

■ Realistic MVP Projections

- Pre-Launch (Whitepaper + funnel only): Asset value £2–3k (Flippa-style speculative).
- MVP with 1,000 subscribers (email list, demo app, early traction): Valuation £10–20k.
- Post-launch with first revenue (£500 MRR): Valuation £50–100k (typical SaaS 8–10× MRR multiple).

■■ Compliance underfunding remains the single greatest risk factor at MVP stage.

■ Investor Critique & Risk Analysis

- Strengths: Lean budget (<£750), staged rollout, transparency-first narrative, social traction.
- Weaknesses: Compliance risk if monetized too early, high execution complexity (ebooks + cold emails + TikTok simultaneously).
- Opportunities: First mover in trust-first, beginner-friendly trading app space; strong affiliate hooks (Plum, Stripe).
- Threats: Regulatory penalties, user trust collapse if app malfunctions, copycat apps with better funding.
